Title of Bachelor Thesis

1st Supervisor: **Prof. Dr. Christian Bartelt**

2nd Supervisor: **Prof. Dr. Rüdiger Ehlers**

9th May 2026

Institute for Software and Systems Engineering
Clausthal University of Technology

Declaration of Authorship

I have read and understood the guidelines of the Technical University of Clausthal and those published in the ISSE bulletin, including those regarding the use of literature and other sources. I confirm that I have prepared this thesis independently by myself. Any information taken from other sources and being reproduced in this thesis is clearly referenced.

In terms of the general examination regulations, this work has not yet been submitted to any other examination division.

I hereby agree that my bachelor thesis may be exhibited in the institute's library and kept for inspection.

Abstract

Depending on the scope of your thesis, describe the work you have performed in a few sentences.

Zusammenfassung

If you write your thesis in English (obligatory for master students), you have to hand in the abstract in German language, too.

Acknowledgements

If you have to say thank you, you can do it here. If you write your thesis in a company, it is often expected to thank them for their support etc. It is also a good chance to give credits to those, who helped you until this point like the assistant that supervised you, scientific staff, that did a lot of supporting work, friends, family

Contents

1	Introduction	1

A1 Is there hope? 9

List of Tables

2.1 First table 2

1 Introduction

1.1 This is a section

We cite [1] as a reference.

You can cite it directly using `citet`: Vaswani et al. [1] present the transformer.

Or indirectly using `citep`: We present the transformer [1].

2 Related Work

Here you present the related literature that falls into the scope of this thesis.

Table 2.1: First table			
Number	Value	Data	Description
1	Answer	42	Asked the question ¹
2	None	– ²	Help!

¹ What was the question?
² No data available. Sorry...

3 Theoretical Background

4 Methodology

5 Experimental Results

6 Discussion

7 Conclusion
